

POLICY OF QUALITY AND ENVIROMENT

CHEMICAL INDUSTRIES TEQ has developed and implanted an Integrated System of Management of Quality and Environment for their services of **Design and manufacture of chemical products for the cleanliness of the home and the industrial maintenance, marketing of chemical products and control and prevention of legionella.**

The Direction of CHEMICAL INDUSTRIES TEQ is fully conscious that the improvements in matters of quality provide more competitive and the important thing is the respect to the environment where we develop our activity.

This policy of Quality and Environment care will be carried out throughout the following guidelines:

- All TEQ CHEMICAL INDUSTRIES workers' compromise with our customers' needs and satisfaction, and with the active participation to improve continuously as regards quality and environment.
- Compromise to fulfill the environmental law and other current legal requirements of application.
- All the workers' compromise in a quick, effective answer in order to face up any incidence or customers' complaints.
- Identification, evaluation and control of the environmental aspects that can take place, with the purpose of eliminating or minimizing their consequences for the environment, and consequently preventing pollution.
- Support to the team work as the most appropriate attitude to achieve the objectives and established goals and to achieve the professional satisfaction of all their members
- The present Policy must be known, understood, be fulfilled and maintained by all the company staff. All these rules will be revised every year by the direction so that they are continuously adapted to the company and its employees' needs. Finally, we want to get our customers' satisfaction and the respect to the environment.
